# AWS Mumbai Region – Final Plan

Goal: Get Mumbai region (ap-south-1) while keeping your AWS credits.

## Step-by-step process

### 1. Current Free Plan

You already have $100 AWS credits. No subscription fee.

### 2. Earn Extra Credits

Complete eligible AWS Explore activities to earn up to another $100. Potential total: $200.

### 3. Verify Credits

Open Billing → Credits and confirm the full $200 is available before upgrading.

### 4. Upgrade to Paid Plan

No fixed monthly subscription fee. You pay for actual AWS usage; eligible existing credits carry over.

### 5. Activate Advanced Features

Activation has no separate fee. It unlocks multi-region access. This action is irreversible and removes existing project spending limits.

### 6. Switch to Mumbai

Select Asia Pacific (Mumbai), region code ap-south-1.

### 7. Verify Credits Again

Open Billing → Credits and confirm your remaining credits are still available.

## Cost summary

| Item | Cost / billing |
|---|---|
| Upgrade to Paid Plan | $0 upgrade fee; no fixed subscription fee |
| Advanced feature activation | $0 activation fee |
| Monthly subscription | $0 fixed monthly fee |
| AWS resource usage | Depends on actual usage |
| Eligible usage covered by credits | No out-of-pocket charge while credits cover it |

## Important warnings

1. Your current $100 AWS Free Tier credit expires on **October 12, 2027**. Any additional credits may have their own expiry dates and terms.
2. Not every AWS service or charge is covered by credits.
3. Advanced-feature activation removes project spending limits.
4. Complete eligible credit-earning activities before activating advanced features.

**Final goal:** Up to $200 AWS credits + Advanced Features + Mumbai Region (ap-south-1).
